BiTrac™ NIV

FEATURES

Our NIV products offer a variety of different features to help facilitate a better fit for patients. Our Pulmodyne silicone cushions have a double lip, which will allow you to gently lay one of our masks on a patients face and still create an efficient yet comfortable seal.

Along with our cushions, we also offer the OmniClip™ which is an adjustable forehead piece on all of our full face masks and our nasal masks. This OmniClip allows you to adjust a mask in and out, or up and down, to help the fit of the mask on the patients face, and reduce the amount of pressure on the bridge of the nose. This feature also lets you swing the mask up and off of the face, to deliver water, food, or prescribed medication to a patient.

Another great feature of our NIV line would also include our headgear with easy to use clips. These clips easily clip on, and a slight twist will detach them. If you lose a clip simply slide the strap through the holes on the mask and velcro it. If a patient has a smaller head, you can use the shorter tab on the strap and cut the access off, for a reliable fit.

BiTrac™ NIV

NASAL

BiTrac NIV Nasal Mask with 22mm Female Standard Elbow, Silicone Forehead Pad, OmniClip™ and Reusable Head Strap. This mask offers a silicone cushion for soft and efficient placement on a patients face. The OmniClip adjusts the forehead pads in and out, as well as up and down for a comfortable fit.

Part #	Description	Size	QTY.
313-9013W	Nasal Mask with Standard Elbow	Adult Small	QTY. 10
313-9014W	Nasal Mask with Standard Elbow	Adult Medium	QTY. 10
